I Change the World. I am an Engineer.

Jane Namaganda-Kiyimba | PhD Researcher in Electrical Engineering

“I teach future engineers and my research designs smart sustainable solutions for electrification of rural and remote areas.”

Advice to girls interested in technology:
“Follow your dreams. There is no limit to what you can do and achieve. Find good role models.”

Yushi Chen | PhD Researcher in Energy and Power Systems

“I simulate behaviours of composite power systems to enhance their reliability and promote overall efficiency.”

Advice to girls interested in technology:
“A long journey begins with one step”

Anita Aliu | PhD Researcher in Control Systems

“My research aims to use control theories to improve the robustness and adaptability of future energy systems.”

Advice to girls interested in technology:
“Find a way or create a way – do not create an excuse”

Siwei Liu | PhD Researcher in Electrical Energy Systems

“For a clean and sustainable world!”

IEEE Women in Engineering
IEEE WIE is the largest international professional organisation dedicated to promoting women engineers and scientists.
