

I have the power!

"I am responsible for electrical asset management in a pharmaceutical manufacturing site for electrical systems."

Advice to girls interested in technology:

"Build a basic foundation of basic concepts to solve complex engineering issues"

Charchita Misra | Senior Engineer : Electrical Systems

I promote 5G wireless innovation.

"I write and publicise blogs and news features about 5G phone technology and the smart connected world of the future."

Advice to girls interested in technology:

"Believe there's no limit to what you can achieve"

Helen Duncan | Technology Content Specialist

I combine programming with hardware.

"I teach developers and operations staff to work together to provide enterprise solutions for flights and insurance companies."

Advice to girls interested in technology:

"Believe in Yourself!"

Ruth G Lennon | DevOps Lecturer

I Change the World. I am an Engineer.

I design intelligent systems.

"I use artificial intelligence to create safe borders and develop systems that understand humans."

Advice to girls interested in technology:

"Discover yourself and you will inspire others"

Keeley Crockett | Reader Computational Intelligence

I lead, inspire and innovate.

"I teach and develop future engineers, researchers and leaders; and I explore new ideas and products for addressing societal issues."

Advice to girls interested in technology:

"You can be a leader in your own right"

Princy Johnson | Senior Electrical Engineering Lecturer

I design smart tutors.

"I teach future computer scientists and my research helps learners by designing intelligent automated tutors to chat to us anytime."

Advice to girls interested in technology:

"Do what you find fun"

Annabel Latham | Artificial Intelligence Researcher
