

Chapter/Affinity Group: Industry Delivery

Reported by: Rod Muttram

Key Achievements & member services in 2021

- Activity has largely been on hold awaiting the resolution of Professional Registration which requires face to face meetings. This is now being picked up again.
- My own time for the IEEE has been more focused on History Milestones and the P7000 series standards with 7000 and 7001 now issued and 7009 still in work

Plan of activities for 2022

- Work with Izzet to deliver or rule out collaboration with the IET on registration
- Depending on the above resolve detail or work to deliver another partner
- Professional Registration is key to retaining Student members through the University to Industry transition and to our relationship with industry
- The ongoing issuing of the 7000 series standards and the roll out of IEEE ethical assessment offer a significant opportunity to work with Ali Hessami to expand industrial engagement once registration is in place

Focus areas (2022-2023)

2021 Goals	2021 KPIs met?	2022 Goals	Challenges to reach KPIs/ Resources
Put professional registration system in place	Largely frustrated by Covid – face to face meetings essential to resolve.	Resolve way forward on Professional Registration	IET has best skill set to deliver as partner but may staff there see IEEE as a competitor rather than a partner
		Brief Industry and members on conclusion of above	Cannot be delivered until partner in place and accepted by Engineering Council
		Brief industry and promote	Best done in conjunction with Professional
