Powering the workforce for Innovation & Entrepreneurship

Thur. 22nd September 2022, 4 pm, Online

Systemic Innovation Special Interest Group (SISIG), under the systems council chapter of the IEEE UK & Ireland is delighted to announce another event in 2022. The current economic climate brought about by a combination of unprecedented world events has made it necessary for businesses and individuals to find ways to remain competitive. This program is dedicated to exploring effective approach and strategies for promoting innovation amongst the current and next generation of the workforce. It is designed to discuss effective ways of empowering the current workforce as well as the youth that will be joining the ranks of workers, with a view to ensure both existing and future employees maintain a productive career and enhance personal and societal success and prosperity.

This event should be of interest to leaders of business and industry, as well as educators who would be looking for new ideas to stimulate innovation and entrepreneurial mindset.

Speaker

Dr Sawsan Khuri FHEA FRSA, is a scientist and entrepreneur, with a personal mission to create synergies and empower the young. She runs two businesses, Collaborative Capacities focused on facilitation and enhancing collaborative innovation, and Volt Entrepreneurs Limited which powers entrepreneurship in young people. Sawsan has spent over 20 years in stakeholder engagement, working with research organisations, businesses and the third sector. She maintains an affiliation with Exeter University’s medical school, and [was recently featured in EXIST](#), Exeter Chamber’s magazine dedicated to STEM business ventures around the South West.
